

Mould design

Mould design: Our engineers and technical staff will collaborate with a client's own engineers on the design of castings to ensure smooth production and optimum performance of the finished product.

Our engineers designed mould by PRO/ENGINEER, SOLIDWORKS, UNIGRAPHICS and simulation analysis software to be sure the quality and high efficiency before tooling machining. Mould cavity and frame will be machined by automatic CNC milling center, CNC turning lathe, EDM , wire cutting machines. Our experiences and technology will be great helpful for you.
